Dear Mrs. [REDACTED] 25X1A9a

I have requested the Security Office here at Battelle to direct to you security clearance for four of our staff members in connection with the Propellants Seminar on June 13 and 14. For our presentation on June 13, we will need only a projector for 3-1/4" x 4-1/4" standard slides. It would also be desirable to have a blackboard available. We expect to bring with us some printed matter for distribution.

I hope this gives you the information you need to proceed with plans for the Seminar. I would appreciate receiving information about the location of the meeting, and times for starting, recessing, and ending the meeting.

Sincerely yours,

R. B. Filbert, Jr.  
Chief  
Chemical Engineering Research

SECRET

REF: DRAFT 12 July 1956

## MEMORANDUM

TO: Mr. L. Malcolm Slight,  
Alternate Member of NSAC for ECA  
25X1A9a

FROM: [REDACTED]  
Alternate Member of NSAC for CIA

SUBJECT: The Significance of Boron in High-Energy Fuels

## REFERENCES:

1. Memorandum from <sup>/L.</sup>Malcolm Slight, Alternate Member of NSAC for ECA, to ~~Mr. Malcolm Slight~~, Alternate Member of NSAC for CIA, "Boron Materials," 5 July 1956, SECRET/NOFORN.
2. NSAC/ID-25 (Revised), 14 September 1955, "Intelligence Related to the Use of Boron Aluminates as Fuels," SECRET/NOFORN.

1. This will reply to your 5 July memorandum in which you call attention to some apparent disagreement among the speakers at the 13-14 June Propellants Seminar, and between them and NSAC/ID-25 (Revised), as to the significance of boron in high-energy fuels.

2. As you know, no official transcript of the Seminar is yet available, which makes it impossible, at this time, to check with accuracy the various remarks made. A review of the draft transcript, however, suggests that any differences that may appear in individual evaluations by the Seminar speakers probably results, at least in part, from the fact that not all of them are familiar with the total research and development program being carried on by the Department of Defense.

3. As soon as an official transcript has been prepared, appropriate Defense and Intelligence representatives will review it from the point of view of its significance to the economic defense program of the United States.
